

Literature gap matrix: one contribution closing the procedural-operationalisation gap

Property	HR-ML applied	Fairness-ML theory	Organisational justice	Behavioural HR	This thesis
Formal group-fairness metrics	absent	DP, EO, EOdds, DI	absent	absent	Part 1
Multi-class fairness extensions	binary only	binary dominant	absent	n/a	Part 1
Procedural fairness as ML metrics	absent	absent	constructs	perceptions	Part 2
Empirical separability test	absent	absent	constructs	perceptions	Part 2
Real HR-decision datasets	proxy	proxy	n/a	perceived	Ricci + IBM
Mitigation evaluated on both dimensions	absent	single criterion	n/a	n/a	Part 3
